

National Goals:				
<ol style="list-style-type: none"> 1. Reduce new HIV infections. 2. Reduce HIV-related disparities and health inequities. 				
Local Comp Plan Objectives:				
<ol style="list-style-type: none"> 1. Increase the estimated percentage of Californians living with HIV who know their serostatus to at least 95%. 4. Decrease the percentage of persons with new HIV diagnoses in California that are diagnosed with Stage 3 (AIDS) within 12 months of diagnosis to less than 17%. 				
Local GTZ Objectives in Goal 1:				
<ol style="list-style-type: none"> 4. Decrease the percentage of persons with new HIV diagnoses in the San Jose TGA area who are 45 years and older that are diagnosed with Stage 3 within 12 months of diagnosis to less than 25% (47% in 2014). 				
Measures to be achieved by July 30, 2018:				
<ol style="list-style-type: none"> 1. Document of baseline HIV data from participating FQHCs. 2. Document number of provider trainings conducted, number of providers trained. 3. Include opt-out testing messaging in public health detailing materials. 4. Document number of contacts made through Public Health Detailing pilot project. 5. Track number of needle exchange clients receiving an HIV test. 				
Main Activity B1: Expand routine opt-out HIV testing in health care settings.				
Targeted Populations: Hospital emergency departments, FQHC and community health centers, primary care providers, jail and prison health systems, Kaiser, Anthem Blue Cross, HealthNet, Covered California Qualified Medical Plans and other private payers in CA, MediCal and MediCal managed care plans and NCQA.				
Process Measures				
Year	Strategy	Key Action Steps	Responsible	Status
2	B	Meet with Community Health Partnership to acquire baseline data*	Lori	April
2	B	Discuss FOCUS grant for ED with Paul Hepfer and Sarah Lewis	Lori	
2	B	Conduct 2 trainings on routine opt-out HIV and STD testing Grand rounds at Stanford and Valley Medical (Raj) How can team help coordinate where to train, connections to schedule training, etc. Lori ask Shannon Weber about work plan they used for GTZ testing Training: HIV Testing and PrEP for MAs, Assessing Risk and talking about sexual health (increasing comfort level with talking about sexuality) Crystal will reach out to AACI nurse manager to ask about training Jenna will reach out to Johnny O’Brien, COO at Foothill	Lori	
2	B	Incorporate opt-out HIV testing information into Public Health Detailing project materials	Raj/Patty	
2	B	Connect with Santa Clara County Medical Association to advertise training in newsletter, hosting provider training, CMEs	Raj	

Outcome measures				
Year	Strategy	Key Action Steps	Responsible	Status
2	B	Include FQHC baseline HIV testing data into GTZ reports	Lori/Candelario	
2	B	Conduct 2 # of trainings on routine opt-out HIV testing and STD testing	Lori	
2	B	# of contacts made through Public Health Detailing project	Raj/Candelario	
Main Activity B3: Expand HIV testing targeted to key populations. Targeted Populations: Gay men and other MSM, PWID, transgender people, Black/African Americans, Hispanics/Latinos, low-income communities, non-English speaking communities.				
Process Measures				
Year	Strategy	Key Action Steps	Responsible	Status
2	B	Track # of Needle Exchange clients who get tested	Raj	
Outcome Measures				
Year	Strategy	Key Action Steps	Responsible	Status
2	B	How many people accessed services at the Needle Exchange and of those, how many received an HIV test and how many were positive.	Raj	

Do the providers at your clinic test everyone 15-65 for HIV as part of routine clinical care?

If yes, what does your workflow look like?

If no, how can we support your efforts in implementing universal testing into clinical care for your patients?
